

WHAT SUNWAY COLLEGE MEANS TO ME

Sunway College was established in response to the public's plea for more educational opportunities. It offers numerous twinning degree courses from Australia, United Kingdom and the United States of America. Monash University, The University of Western Australia, Curtin University of Technology and The Flinders University of South Australia, Western Michigan University in the United States of America and Leicester University in the United Kingdom complete the six universities located in our college. In addition, Sunway College also offers the TEE programme and an intensive English programme. Courses such as engineering, computer science, business administration, accounting and economics, which are considered the elite courses are now available to an average Malaysian student at minimal cost. In addition to cost savings, by spending one or two years at Sunway College, students are not exposed to the cultural shock and nostalgia at an early

stage. This will aid a student in preparing to acclimatise himself/herself overseas after completing his/her course here.

In meeting the standards set by the universities, the College provides first-class facilities to accommodate the needs of the students. Sunway College has an impressive library, which stores a wide range of books and an auditorium which is useful for lectures and other non-curricular activities. The cafeteria serves a wide variety of cheap and delicious food and the student lounge provides indoor games and exercise for students. We even have a gym for the fitness fanatics.

As a student at Sunway College, I feel very lucky that it has provided me the opportunity to continue my tertiary education. I never once doubted that this college has given these opportunities to other students as well. Finally, I hope that all those students out there who wish to continue their tertiary education, come grab this opportunity at Sunway College.
