Vice-Chancellor's Preface

I am delighted to introduce this review of Sunway University's progress during 2019. It was indeed a year of new heights reached, and new partnerships established, that will give us new opportunities to take the University much further forward in the years to come.

Undoubtedly the highlight of the year was that for the very first time we entered the QS global rankings and were placed among the top 800 universities in the world. Also, we were ranked in the top 150 institutions in the world under fifty years old and also moved up in the QS Asia ranking to position 194, placing us in the top 1.5% of universities in Asia. While we are still very young as an institution, having only become a full university in 2011, it is extremely satisfying that we can now count ourselves among the excellent institutions not only in Asia but also in the world and among the leading universities formed within the last few decades.

Rankings do not of course represent the sole indicator of university success and I am delighted that the University won a number of awards for our brand recognition as well as our largest ever national research grant to date. There is much to report on our successes of 2019 and the following pages will give you a taste of some of the key achievements.

As always, I must express my gratitude for the dedication and sheer hard work of all the staff, as well as the on-going commitment of our stakeholders, in helping us to achieve our goals and make a strong contribution to the development of the nation.

Professor Graeme Wilkinson
Vice-Chancellor

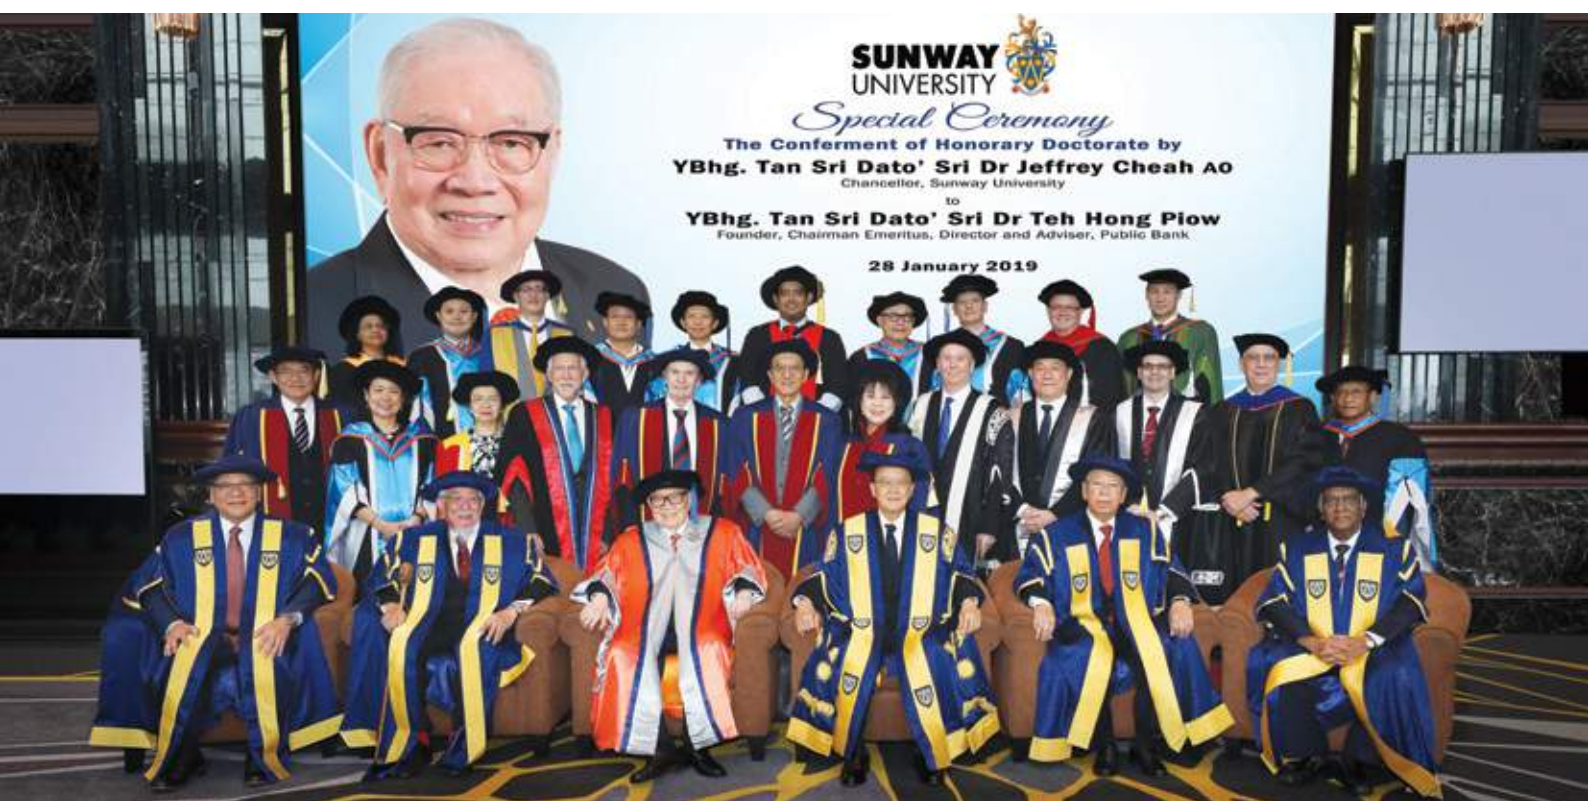

The Year in Review

Highlights and Achievements of 2019

The year 2019 was another outstanding one for Sunway University. The University continued to grow in scale, income and rankings and a number of new partnerships were initiated to enhance international education and research. The total number of enrolled students rose to around 7700 and the annual income increased to almost RM 200 million. Significant steps were also taken during the year to increase the cultural activities of the University and to engage more with the local community through the arts.

In the early part of the year, between January and March, the University undertook a major exercise to set a strategy going forward for the period 2020-2025. This exercise involved approximately 90 staff and stakeholder representatives and consisted of a set of strategic planning labs which were facilitated by Pemandu Associates Sdn. Bhd. The labs enabled senior staff of the University and of the wider Sunway Education Group, together with academics and other stakeholders, to brainstorm initiatives to achieve academic growth, financial sustainability, and improve external engagement; all with the objective of transforming the University into a “medium-sized excellent global university” by 2025. A total of 50 strategic projects were identified through the process to take forward the development of the university in order to meet the goals set for 2025. These projects are now overseen by the University Strategic Management Committee.

Also, in January, a special ceremony was held to confer an honorary degree of Doctor of the University on Tan Sri Dato' Sri Dr Teh Hong Piow, Emeritus Chairman of Public Bank Berhad, for having founded and overseen the evolution of Public Bank Berhad into a modern and integrated financial institution and for his outstanding contribution to the growth of the financial services industry in Malaysia.

The Year in Review (continued)

In April, the University launched its first international joint research centre with Huizhou University, Guangdong Province, China. This joint centre dedicated to Information Technology, and particularly the Internet of Things (IoT), will enable academics of both institutions to collaborate on leading edge research in the field. It will also facilitate staff and student exchanges between Sunway and Huizhou. A cooperation agreement was also signed in April with Capital University of Economics and Business, Beijing, to enable their students to spend study abroad periods in Sunway.

During the year, a philanthropy office was established to create a fundraising ecosystem within the University and to develop the potential of philanthropic fundraising for higher education in Malaysia. In April, the University was indeed fortunate to receive its first major donation from an alumnus, namely Dr Lim Teck Ting (centre), founder of Super Memory Map Sdn. Bhd., a leading provider of pre-school education. Dr Lim was the very first PhD graduate from the Sunway University Business School and made a major donation to support doctoral scholarships in the field of entrepreneurship.

Throughout the year, efforts continued to build academic teaching collaborations with a number of overseas institutions to enable staff and student exchanges, to facilitate study abroad periods for students, and to enable students to progress onto overseas universities to top-up their studies. In May, an academic collaboration agreement was signed with the Eastern Institute of Technology, New Zealand, in the presence of His Excellency Hunter Nottage (centre), the High Commissioner of New Zealand, to Malaysia.

The University continued to build more links with some of the world's leading universities and hosted visitors and distinguished speakers from universities such as Oxford, Cambridge, Harvard, Massachusetts Institute of Technology, and the London School of Economics and Political Studies. Of particular note was the Vice-Chancellor of Cambridge University, Professor Stephen Toope (left) who visited in June, and the former Vice-Chancellor of Cambridge, Sir Leszek Borysiewicz, who visited in September, accompanied by a cohort of Borysiewicz Fellows from Cambridge.

In June, the University was ranked in the QS World University Ranking for the very first time and placed in the bracket 751-800. This recognition places the University in the top 3% of universities in the world. This excellent result was followed by the news in November of a rise in the QS Asia ranking from position 232 to 194, placing Sunway in the top 1.5% of universities in Asia. The University was also ranked among the top 150 young universities worldwide by QS.

In July, a second international joint research centre was established. The Future Cities Research Institute (FCRI), a collaboration between Lancaster University, UK and Sunway University was launched by the Chancellor of Lancaster University, the Right Honourable Alan Milburn (left), along with the Chancellor of Sunway University, Tan Sri Dato' Seri Dr Jeffrey Cheah AO. This Institute will bring together researchers from a range of disciplines who will be working on issues related to growing world urbanisation, focussing on smart technologies in tackling problems related to sustainable urban living.

The Year in Review (continued)

In August, the University's status as a Premier Digital Technology University was re-confirmed for a further three years. This special status is only given to selected Malaysian universities by the Malaysia Digital Economy Corporation (MDEC). The status reflects the high quality of Sunway's information technology education and research, the employability of the University's IT graduates, the IT infrastructure, and the embedding of digital technology and digital skills in the curriculum across the whole university. Only eleven universities in total were given this special status following a rigorous evaluation by MDEC.

During the year, the University continued to pursue one of its key objectives which is to raise awareness of the Sustainable Development Goals (SDGs) among the students, staff and the wider public. In September, an event was held on campus to celebrate the SDGs and to encourage wider engagement with them. The event involved a musical celebration (appropriately named "Rock the Goals") and was graced by the Crown Prince of Selangor YM Tengku Amir Shah. Other industry leaders and ambassadors from several countries also attended the event.

**SUSTAINABLE
DEVELOPMENT
GOALS**

PUTRA BRAND AWARDS — THE PEOPLE'S CHOICE —

In September, the University won the Putra Brand Gold award for the second consecutive year. The Putra Brand Awards are based on national consumer brand awareness research, and the repeated gold award demonstrated that the University is now consistently viewed as one of the leading brands in the higher education sector in Malaysia.

In October, the University was declared overall champion in the 2019 Graduates' Choice Award, resulting from a national survey of students. The award is for organisations demonstrating leading employer branding as perceived by university students in the country. This award signifies that Sunway University continues to be highly regarded by tertiary students in the nation.

During the year, the University began a collaboration with the Chopin Society of Malaysia (Persatuan Chopin Malaysia) to bring outstanding international music performers to Sunway. A range of concerts were held on campus which were open to the public, including one in November by Vladimir Gerts, an opera singer from the Bolshoi Theatre, Moscow, arranged in collaboration with the Russian Cultural Centre, Kuala Lumpur. The collaboration has enabled the Chopin Society to offer concerts in a high-quality venue and has enabled the University to promote the appreciation of music and culture to the wider community.

University Governance

Board of Directors

- Tan Sri Dato' Seri Dr Jeffrey Cheah Fook Ling AO
Chairman
- Tan Sri Dato' Dr Ramon V. Navaratnam
- Tan Sri Datuk Seri Razman M Hashim
- Tan Sri Dato' Seri Dr Ranjit Singh
- Tan Sri Dato' Dr Lin See Yan
- Dato' Chew Chee Kin
- Dato' Sri Idris Jala
- Dato' Dr Lee Weng Keng
- Dr Elizabeth Lee
- Professor Graeme Wilkinson
- Professor Jarlath Ronayne
- Professor Sibrandes Poppema

Our Students Discovering New Ideas

Unlike the rest of her classmates who went on to corporate jobs, Joe Ann Eng's burning desire was to help the refugee communities in Malaysia. Armed with a BSc in Actuarial Studies, Joe Ann founded On Humanity, a Non-Governmental Organisation aimed to strengthen refugee communities through education, food subsistence, and job opportunities; providing equal opportunities for all, regardless of race, religion, or background.

As part of her enterprising endeavour and to educate other students about the plight of refugees, On Humanity organised "OH! Bridges Not Walls", an interactive session where students had the opportunity to learn directly from refugee families on their struggles and stories. Funds were also raised during the event and it was channelled toward purchasing basic food supply for families in need. Aside from the event, Joe Ann actively reaches out to other like-minded individuals both on campus as well as off campus and has secured a partnership with The Lost Food Project to help provide an alternative source of basic food supply for this community.

2019中国—东盟教育交流周 2019 China-ASEAN Education Cooperation Week

阿里巴巴全球数字创新创业大赛总决赛 Alibaba Global Digital Entrepreneurship and Innovation Challenge Grand Final

During the year, three aspiring entrepreneurs from the School of Science and Technology, Tony Ng Wei Shyang, Tan Haolun, Lim Shi-Hern together with a student from San Francisco State University, Jeremy Tan Pao Yang came together to set up “Snuffles”, a student-run data analytics start-up that aims to empower aspiring drop shippers with easily digestible data to select winning products for their e-commerce shops. “Snuffles” intends to increase the participation of unemployed youths in the e-commerce industry by helping them gain a competitive edge through data analytics. This project was the antecedent to the Alibaba’s Global e-Commerce Talent (GET) programme, a collaborative programme between Sunway University and the Alibaba Group.

In February 2019, the team went through the iLabs’Jumpstart Mentorship Programme prior to their selection by Alibaba GET, to participate in the GET Digital Entrepreneurship and Innovation Challenge in Guizhou, China. In competition with 9 other teams from universities around the world, Team Snuffles, came in 2nd and received full funding for a 3-week training programme in China.

It was also noteworthy that Team “Snuffles” registered a record-breaking 391% ROI (return on investment) in the Alibaba’s e-commerce simulation platform. Judges heaped praises for the team’s outstanding performance, innovative analytical solutions and practical approach to problem solving in the e-Commerce industry. “Snuffles” had developed a full working prototype and were recruiting early adopters to test their solutions platform.

Academic Developments

Academic Standards

Sunway University has always been committed to assuring the standards and quality of the awards and educational experience enjoyed by its students, and in the year 2019, recognition of this commitment was given not only by local authorities but also from international bodies.

In August 2019, Sunway University was chosen by the Malaysian Qualifications Agency (MQA) as one of the main private institution to host a group of international delegates from education ministries and quality assurance agencies from various countries, such as Afghanistan, Timor-Leste, Mauritius and Seychelles, as part of MQA's Internship Programme. The main objective of the programme was to share Sunway University's internal quality assurance systems and processes with the international delegates who were eager to learn best practices in assuring quality in the delivery of higher education programmes. The University's involvement in MQA's Internship Programme shows the level of confidence and recognition awarded by MQA on the quality of Sunway University's delivery of higher education.

Sunway University also participated in the UK Quality Assurance Agency (QAA) review of UK transnational education in Malaysia which focussed on Lancaster University's partnership with Sunway University. The review took place in October, and was conducted by the QAA review panel and attended by MQA representatives. Sunway University has been in partnership with Lancaster University since 2006, offering a suite of undergraduate and postgraduate programmes. This long-standing partnership with Lancaster University provides an educational experience for Malaysian students that meet UK academic standards and quality requirements. The QAA review of the partnership indicated that there are effective processes in place for setting and maintaining academic standards, and that Sunway University provides a high-quality experience for its students. This partnership will continue to develop in breadth and depth, as discussions of multi-disciplinary offerings with increased emphasis on postgraduate degrees and expanding research collaborations, are underway.

In 2019, further initiatives were also undertaken to enhance academic staff productivity and efficacy of the academic community in monitoring, maintenance and enhancement of academic quality. One such initiative was the implementation of a Programme Management System, IonCUDOS - a platform that automates outcome-based education (OBE) best practices, ranging from curriculum design, delivery and assessment planning to attainment of graduate attributes. The Academic Standards and Quality Office also conducted several training workshops to the academic community on OBE requirements and curriculum design. With these initiatives in place, the University is in a better position to manage the effective implementation of OBE.

Academic Enhancement

● Academic Staff Development and Learning

In 2019, the University continued to enhance its support for academic staff development and student learning. Student performance and feedback data formed the basis of the year's focus for academic staff development, resulting in a variety of professional development programmes which better addressed gaps in teaching and learning practices.

Increased engagement between the Academic Enhancement Division and academic departments also proved effective in addressing issues and challenges in teaching and learning unique to specific groups. This led to collaborative efforts in identifying departmental strategies for improvements and customised workshops designed for a specific audience. Some examples include workshops on alternative assessments, project-based assessments and blended learning implementation.

The Lancaster University Postgraduate Certificate in Academic Practice (PgCAP) continued to be co-delivered by Lancaster University and Sunway University, primarily through the Academic Enhancement Division. The programme offered at Sunway was identified by Lancaster University as the most outstanding among all of Lancaster's international partners, in terms of delivery strategies and successful completion rate. This was also commended by a UK Quality Assurance Agency review carried out in 2019 on the transnational partnership between both institutions. Cohort 2019 commenced in August with 20 participants, the highest cohort enrolment to date. The total number of academic staff enrolled in PgCAP at various stages in 2019 was 35.

Twenty staff participated in the eighth International Partnership Development programme conducted at Lancaster University in March with a theme focused on "Globalisation of the Curriculum". Participants gained better insights on how various strategies in globalising the curriculum could result in more inclusive programmes and enhancement of graduate attributes. Since its commencement, 136 staff have gained the benefits from the programme.

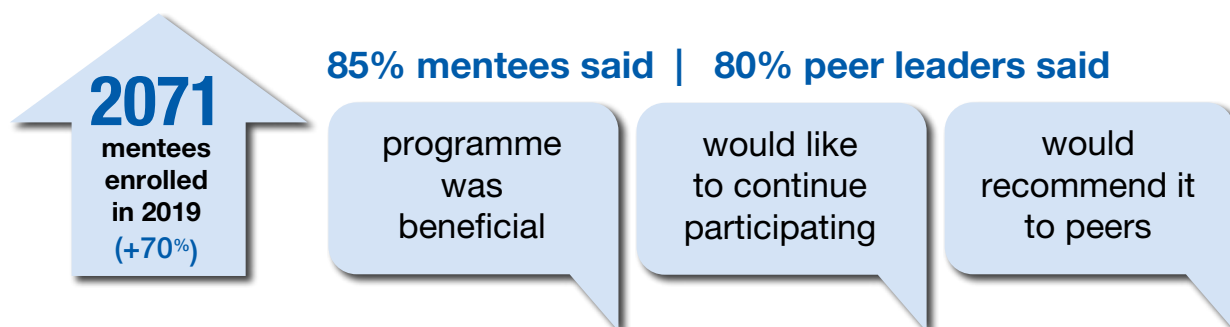

- **Technology Enhanced Learning Support**

A group of academic staff across the schools and departments were identified as advanced practitioners in specific areas of teaching and learning, technology. They served as a more readily accessible support to their peers and work closely with the Academic Enhancement Division to help promote best practices in pedagogic approaches.

- **Peer Assisted Learning Programme**

The Peer Assisted Learning Programme (PALP) continues to support a number of first- and second-year bachelor's degree students who were deemed "at risk". Weekly peer learning sessions were facilitated by peer leaders who are high achievers that have been carefully selected and trained to effectively facilitate peer learning, share relevant learning strategies and resources with their peers.

Student feedback consistently demonstrated that participants, whether as peer leaders or mentees, who have undergone the programme, gained better understanding of their subjects and experienced improvement in communication skills as well as ability to seek or provide support in times of learning difficulty. Student feedback on PALP correlates positively with their subject performance. Data shows that students who regularly attend PALP learning sessions are more likely to achieve better grades and are less likely to fail that subject.

Research Highlights

Outstanding Research

2019 was another exceptional year for research in the University with over 550 papers published and over 4000 citations. A total exceeding RM 3.5 million was secured in external grant income which was a 64% increase from the previous year. Approximately RM 854,000 was from The Ministry of Education Fundamental Research Grant Scheme (FRGS) awarded to eight of our academic staff. Other notable successes include Dr Yong Min Hooi who was awarded the Ministry of Education's Long-term Research Grant Scheme (LRGS) amounting to RM 2,473,400 for her project on "Successful Ageing: Evidence-based interventions to delay ageing-related decline" and Professor Glenda Crosling's project on "Technical Writing on the Study on Enhancing Intra-ASEAN University Student Mobility" funded by the British Council amounting to RM 832,386. Mr Matt van Leuwen from Sunway iLabs and Ms Karen Chand from the Jeffrey Sachs Centre on Sustainable Development also secured external grants amounting to RM 63,600 in total from Sunway Lagoon and the Sustainable Development Solutions Network respectively.

Dr Yong Min Hooi (centre), flanked by Dr Audrey Lim (left) and Dr Nur Ain Shahrier (right).

Two academic staff achieved outstanding results in their research initiatives. Professor Mohd Kheireddine Aroua [Associate Dean (Research) and Head of Research Centre for Carbon Dioxide Capture and Utilisation] and Professor Saidur Rahman [Head, Research Centre for Nano-Materials and Energy Technology] were recognised as 2019 Highly Cited Researchers by The Web of Science Group who identifies the world's most influential researchers annually. In 2019, only 0.1% of the world's researchers across 21 research fields earned this exclusive distinction. Professor Kheireddine Aroua and Professor Saidur Rahman were among this elite group recognised for their exceptional research influence, demonstrated by the production of multiple highly-cited papers that rank in the top 1% by citations for field and year in Web of Science.

Also noteworthy was the success of a joint research funding application by Sunway University and Lancaster University, resulting in the Global Challenges Research Fund (GCRF) for the project entitled "ProtoPolicyAsia: empowering local communities and Government in Malaysia in addressing social issues in ageing and disabilities". The project involves the Ministry of Women, Family and Community Development Malaysia, Petrosains - The Science Discovery Centre in Kuala Lumpur, Lancaster University, Sunway University and United Nations University - International Institute for Global Health in Malaysia. Co-investigators from Sunway led by Dr Yong Min Hooi from the Department of Psychology were Associate Professor Dr Lau Sian Lun (Department of Computing and Information Systems), Associate Professor Dr Hwang Jung Shan (Department of Medical Sciences) and Dr Clarissa Lee (Jeffrey Sachs Center on Sustainable Development).

Prof. Kheireddine at the Malaysia's Research Star Award (MRSA) 2019

Research Centres

In 2019, The University also established several research centres to further emphasise impactful research that addresses societal needs. One such centre is the Research Centre for Human-Machine Collaboration (HUMAC), established with research foci areas of senses: visual, audial, haptics, olfactory, motion; as well as analytics, and robotics through a multi-disciplinary approach. Its current research projects are focused on assisting individuals who are Blind and Visually Impaired (BVI), by investigating haptic apps for online shopping, robotic sensing, sensing & tracking as well as the use of drone technologies.

Malaysia's First Dedicated 2D Materials Research Lab was also established during the year. It is envisaged that this RM 3.5 million investment in leading edge facilities will advance the development of a novel graphene nano lubricant for automotive and industrial application as well as new 2D materials for supercapattery and low-cost thermoelectric generators.

With the development of technology at an exponential pace, cyber security and data security have become the critical concern of every industry. In view of that, the CyberSecurity Intelligence (CSI) Lab was launched in October to serve as a platform to connect academia and industry and encourage greater exchange and collaboration among stakeholders, in order to accelerate the development of cybersecurity talents as well as to strengthen cybersecurity expertise in the country.

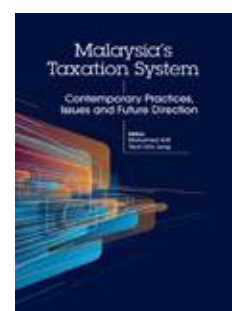

Other Research Activities

The School of Arts put together its first large scale fully immersive virtual reality experience showcasing the rich cultural heritage of Malaysia. The project sought to explore the possibilities of introducing an instructional/visual experiential museum through the Malaysian Cultural Heritage projects being conducted in the Centre for Research-Creation in Digital Media.

This endeavour provided the platform for bridging arts with archaeology, anthropology, cultural studies, history and other disciplines, and also sparked other collaborations such as the work with UNESCO through the Universiti Kebangsaan Malaysia. The Unseen Arts in the Malay Culture and Heritage, another following research project aimed to digitize selected tangible and intangible culture and heritage of the Malay culture empire, that had typically been overlooked or disregarded.

Academics from the Business School were contributing authors in a book commissioned by the Malaysian Tax Research Foundation. The book entitled Malaysia's Taxation System: Contemporary Practices, Issues and Future Direction is a comprehensive analysis of current taxation practices, issues and challenges in Malaysia and was edited by Professor Mohamed Ariff Syed Mohamed and Professor Yeah Kim Leng and published by the Sunway University Press.

External Research Grants Awarded

Listed in the order of quantum received

Principal Investigator	Title of Research	Funding Body	Amount (RM)
Dr Yong Min Hooi	Successful ageing: Evidence-based interventions to delay ageing-related decline	Ministry of Education, Long term Research Grant Scheme	2,473,400
Professor Glenda Crosling	Technical writing on the study on enhancing intra-ASEAN university student mobility	British Council	832,386
Dr Yong Min Hooi	Employing speculative design in enabling governments and community groups to imagine the future implications of health policy initiatives in creative ways	Arts Humanities Research Communities (AHRC)	212,046
Dr Chook Jack Bee	Fundamental understanding of DNA methylation of Hepatitis B virus prior to hepatocarcinogenesis and its role in replication	Ministry of Education, Fundamental Research Grant Scheme	185,700
Dr Teow Sin Yeang	Investigating the role of SIRT1-autophagy regulatory axis in chemoresistance in hepatocellular carcinoma (HCC) using 3D tumour spheroid in vitro model	Ministry of Education, Fundamental Research Grant Scheme	173,810
Dr Yow Yoon Yen	Investigation of cellular and molecular mechanisms of Gracilaria manilaensis-mediated functional recovery enhancement following peripheral nerve injury in an in vivo model	Ministry of Education, Fundamental Research Grant Scheme	118,800
Dr Yong Min Hooi	The adult neuroplasticity model: Age related decline in executive function	Ministry of Education, Fundamental Research Grant Scheme	100,200
Professor Mohamed Ariff Syed Mohamed	Sovereign Debt, Credit Rating and Fiscal Sustainability	Ministry of Education, Fundamental Research Grant Scheme	85,700
Associate Professor Dr Chua Hui Na	A stakeholder interaction model to understand data protection regulations in the globalized digital age	Ministry of Education, Fundamental Research Grant Scheme	66,600
Dr Gew Lai Ti	Conversion of glycerol to value-added products through biocatalysis reaction using microreactor	Ministry of Education under the Hubert Curien Partnership - Hibiscus programme	66,000
Associate Professor Dr Teh Pek Yen	Redefining the past for the future: The investigation of nostalgic attachment for the representation of Ipoh Cultural heritage in the 21 st century	Ministry of Education, Fundamental Research Grant Scheme	65,752

External Research Grants Awarded (continued)

Listed in the order of quantum received

Principal Investigator	Title of Research	Funding Body	Amount (RM)
Professor Yau Kok Lim	A novel clustering algorithm based on reinforcement learning for the optimisation of global and local network performances in mobile networks	Ministry of Education, Fundamental Research Grant Scheme	57,200
Dr Tan Ai Ling	Data collection study on business events economic	Malaysia Convention & Exhibition Bureau (MyCEB)	47,000
Professor Abhimanyu Veerakumarasivam	ASEAN responsible conduct of research project	International Science Council	35,002

Jeffrey Cheah Travel Grants for Southeast Asia Studies

From Sunway to Harvard: A Master's student's experience

Sunway University Master's degree student, Charlene Sha Hong Xi received the Jeffrey Cheah Travel Grants for Southeast Asia Studies amounting to USD 6,250 for her research attachment at Harvard University in the 2019 Spring Semester. Charlene spent one month in the laboratory of Dr Elise Robinson for her research on the methotrexate pharmacogenetics in the treatment of rheumatoid arthritis. During her visit, Charlene had the opportunity to learn the most up-to-date programming language - R studio from Dr Kumar Veerapen and the genetic analysis tool - Plink from Dr Raymond Walters.

Scholarly Activities

Jeffrey Cheah Distinguished Speaker Series (JCDSS)

4 January

Transformative Education for Global Health Equity

Speaker:
Professor Lincoln Chen
President of the China Medical Board

19 August

Measuring the World – Can We Believe The Statistics?

Speaker:
Professor Denise Lievesley
CBE, FAcSS
Principal of Green Templeton College, University of Oxford

24 January

Human Anatomy and Forensic Anthropology in Child-Related Crime Investigations

Speaker:
Professor Dame Sue Black
FRSE FRAI FRSE
Pro-Vice-Chancellor (Engagement), Lancaster University

21 November

How Quantum Mechanics Might Answer Life's Biggest Questions

Speaker:
Professor Jim Al-Khalili
OBE FRS FInstP
Professor of Physics, Chair in the Public Engagement in Science, University of Surrey

10 June

Global Universities in An Age of Anxiety

Speaker:
Professor Stephen J Toope
OC, LLD
Vice-Chancellor, University of Cambridge

27 November

Optimism in the Past, Pessimism in the Future?

Speaker:
Dame Minouche Shafik
Director, London School of Economics and Political Science

28 June

Climate Change and Unique Challenges to Pacific Island Countries

Speaker:
HE The Honourable Baron Waqa
President of the Republic of Nauru

Professorial Lecture Series

23 April

Transforming Business Action Towards Eliminating Plastic Waste

Speakers:

Professor Gail Whiteman

Director of the Pentland Centre for Sustainability in Business, Lancaster University

Professor Jeffrey Unerman

Associate Director, Pentland Centre for Sustainability in Business, Lancaster University

18 June

Designing and Delivering Tomorrow's World

Speakers:

Professor Nick Dunn

*Professor of Urban Design
Executive Director of ImaginationLancaster
Associate Director of the Institute for Social Futures, Lancaster University*

Professor Harry Hoster

Professor of Physical Chemistry and Director of Energy Lancaster, Lancaster University

31 October

Energy from the Sun: Role of Nanotechnology

Speaker:

Professor Saidur Rahman

*Distinguished Research Professor
Head of Research Centre for Nano-Materials and Energy Technology, Sunway University*

Jeffrey Cheah Institute
on Southeast Asia

Date	Topic	Event Type
19-21 January	ASFRC Meeting: Rising Debt and the Next Financial Crisis	Closed door meeting and press conference
23 January	The National Security Framework for ASEAN In a Multi-Polar World	Forum
28 January	The 2018 Malaysian General Election: The Return of Mahathir and the Exit of UMNO	Forum and the launch of the Journal of Current Southeast Asian Affairs
28 March	The European Economy and Monetary Policy in and Out of the Crisis	Public lecture
29 March	Asian Economic Panel Meeting	Closed door meeting and paper presentations

Scholarly Activities (continued)

Jeffrey Cheah Institute on Southeast Asia (continued)

Date	Topic	Event Type
11 April	<p>Topic 1: Current Financial Survivability Challenges in Malaysian Higher Educational Institutions</p> <p>Topic 2: Adapting University Education to the Needs of the Fourth Industrial Revolution</p>	Education forum
27-28 April	The United Nations Children's Fund (UNICEF) Training on Children's Rights and Business Principles	Training <i>(in collaboration with UNICEF)</i>
27 May	Beauty Regimens: Disciplining Filipina Labour in Colonial Schools and Prisons	Public lecture <i>(JCI Scholar Sharing Session)</i>
29 May	Can Electoral Systems Encourage Politics of Moderation?	Dialogues session
10 June	The Belt and Road Initiative: Myths and Misconceptions of China's Motives and Involvement	Public lecture
18 June	Socio-Ecological Strategies and Urban Design Practices in the Tropics	Public lecture <i>(JCI Scholar Sharing Session)</i>
8 July	<p>Topic 1: Changing Mind-set of Private Universities: The Case of the International University of Malaya-Wales (IUMW)</p> <p>Topic 2: The Rise of Malaysian Private Universities in Quality and World Ranking: Implications and Impact</p>	Education forum
10 July	Workshop on How to Develop and Pitch a Policy Proposal and Public policy Competition	Workshop & Competition <i>(in collaboration with Student LIFE, part of the Sunway Student Exchange Programme)</i>
9 August	The Dragon Amongst Tigers: China and Cross Border Trade Shocks in Asia	Forum
19 August	Beyond 2020: Fresh Views, New Visions	Forum <i>(in collaboration with the CENTRE)</i>
6 November	Growth and Job Creation for Our Youth	Closed door roundtable discussion <i>(in collaboration with REFSA)</i>
18 November	ASEAN Sustainability Summit 2019	Conference <i>(in collaboration with ASLI)</i>
26 November	Endowment: The Only Way Forward for University Survival	Education Seminar
4 December	Social Media and New Politics in Malaysia	Forum & Book Launch <i>(in collaboration with School of Arts, Sunway University)</i>
7 December	Youth Defence Summit 2019	Conference <i>(in collaboration with #UNDI18 and supported by the office of the then Deputy Defence Minister, Malaysia)</i>
10 December	Malaysian Trolls: Internet-based Political Trolling as the New Normal in Malaysian Politics	Public Lecture

Date	Topic	Event Type
24 March	Empowering Civil Society Leaders for Sustainable Development, organised in collaboration with MyPJ	Community workshop
20 April	Rotary Club Plastic Workshop & Sustainability	Community workshop
14-15 May	Global Solutions Forum (GSF) Workshop series: 1: Sustainable and Inclusive Economic Growth 2: Land Regeneration and Smart Infrastructure 3: Social Inclusion	Workshop
25 May	Executive Training for APM Automotive - Sustainability Awareness and Corporate Sustainability Reporting	Executive training
6 August	Workshop on Organisations and the Sustainable Development Goals (SDGs) for Victoria University students	Workshop
8 August	Global Solutions Forum (GSF) Consultative Workshop Follow Up Session - Sustainable and Inclusive Economic Growth	Workshop
26 August	Leadership Sustainability Initiative workshop for Lancaster University students.	Workshop
7-8 October	Executive Training for Daiken Sarawak on the United Nations Sustainable Development Goals (SDGs)	Executive training
18 November	ASEAN Sustainable Development Summit 2019 in collaboration with the Asian Strategy and Leadership Institute (ASLI) and the Sustainable development Solutions Network Malaysia Chapter (SDSN-Malaysia)	Summit

Jeffrey Sachs Center on Sustainable Development hosted the Rotary Club of Bukit Kiara Sunrise at the Sunway University Post Graduate Lounge.

ASEAN Sustainable Development Summit 2019 at the Sunway Resort Hotel & Spa.

International Collaborations

Agreement with the Royal College of Physicians London

In March 2019 an agreement between the Royal College of Physicians London (RCP), Sunway University and Sunway Medical Centre was signed by Tan Sri Dr Jeffrey Cheah AO, Chancellor of Sunway University, Professor Ali Jawad, Vice-President RCP Global, Professor Sir Stephen O'Rahilly FRS, Director of the Wellcome - MRC Institute of Metabolic Science, Cambridge, and Mr Lau Beng Long, Managing Director, Sunway Medical Centre. The Agreement provides for biannual delivery of RCP-Cambridge-Sunway Continuing Medical Education (CME) seminars as well as a training programme for the practical element of the MRCP Part 2 examination (PACES). The first CME Seminars took place in April 2019 and, in September, CME Seminars and the first PACES training programme were successfully conducted in Sunway Medical Centre.

The RCP London is the oldest medical institution in the United Kingdom. It received a royal charter from King Henry VIII in 1518, and is a peak professional body dedicated to improving the practice of medicine mainly through accreditation of physicians by examination.

Speakers at the two CME Seminars included Dr Jane Sterling and Dr Fraz Mir (Addenbrooke's Hospital); Professor Edmund Ong (NUMed); Dr Russell Roberts (Associate International Director RCP); Professor Tan Maw Pin (Universiti Malaya)

Third Cambridge-Oxford-Sunway Biomedical Symposium

The third Cambridge-Oxford-Sunway Biomedical Symposium was held in March at the Sunway Medical Centre. The Symposium was convened by Professor Sir Stephen O'Rahilly FRS, and was opened by the Malaysian Minister of Health, YB Datuk Seri Dr Haji Dzulkefly bin Ahmad. The speakers were:

Cambridge University

- **Professor Sir Stephen O'Rahilly FRS**, Wellcome-MRC Institute of Metabolic Science
- **Professor Nick Wareham**, MRC Epidemiology Unit
- **Professor Fiona Gribble**, Department of Neuroscience

Oxford University

- **Professor Rory Holman**, Department of Diabetic Medicine
- **Professor Kieran Clarke**, Department of Physiological Biochemistry
- **Professor John Todd FRS**, JDRF/Wellcome Trust Diabetes and Inflammation Centre

Monash University

- **Professor Mark Cooper AO**, Diabetes Department
- **Professor Paul Zimmet AO**, Diabetes Department
- **Professor Dato' Dr Khalid Abdul Kadir**, Jeffrey Cheah School of Medicine & Health Sciences, Monash University Malaysia

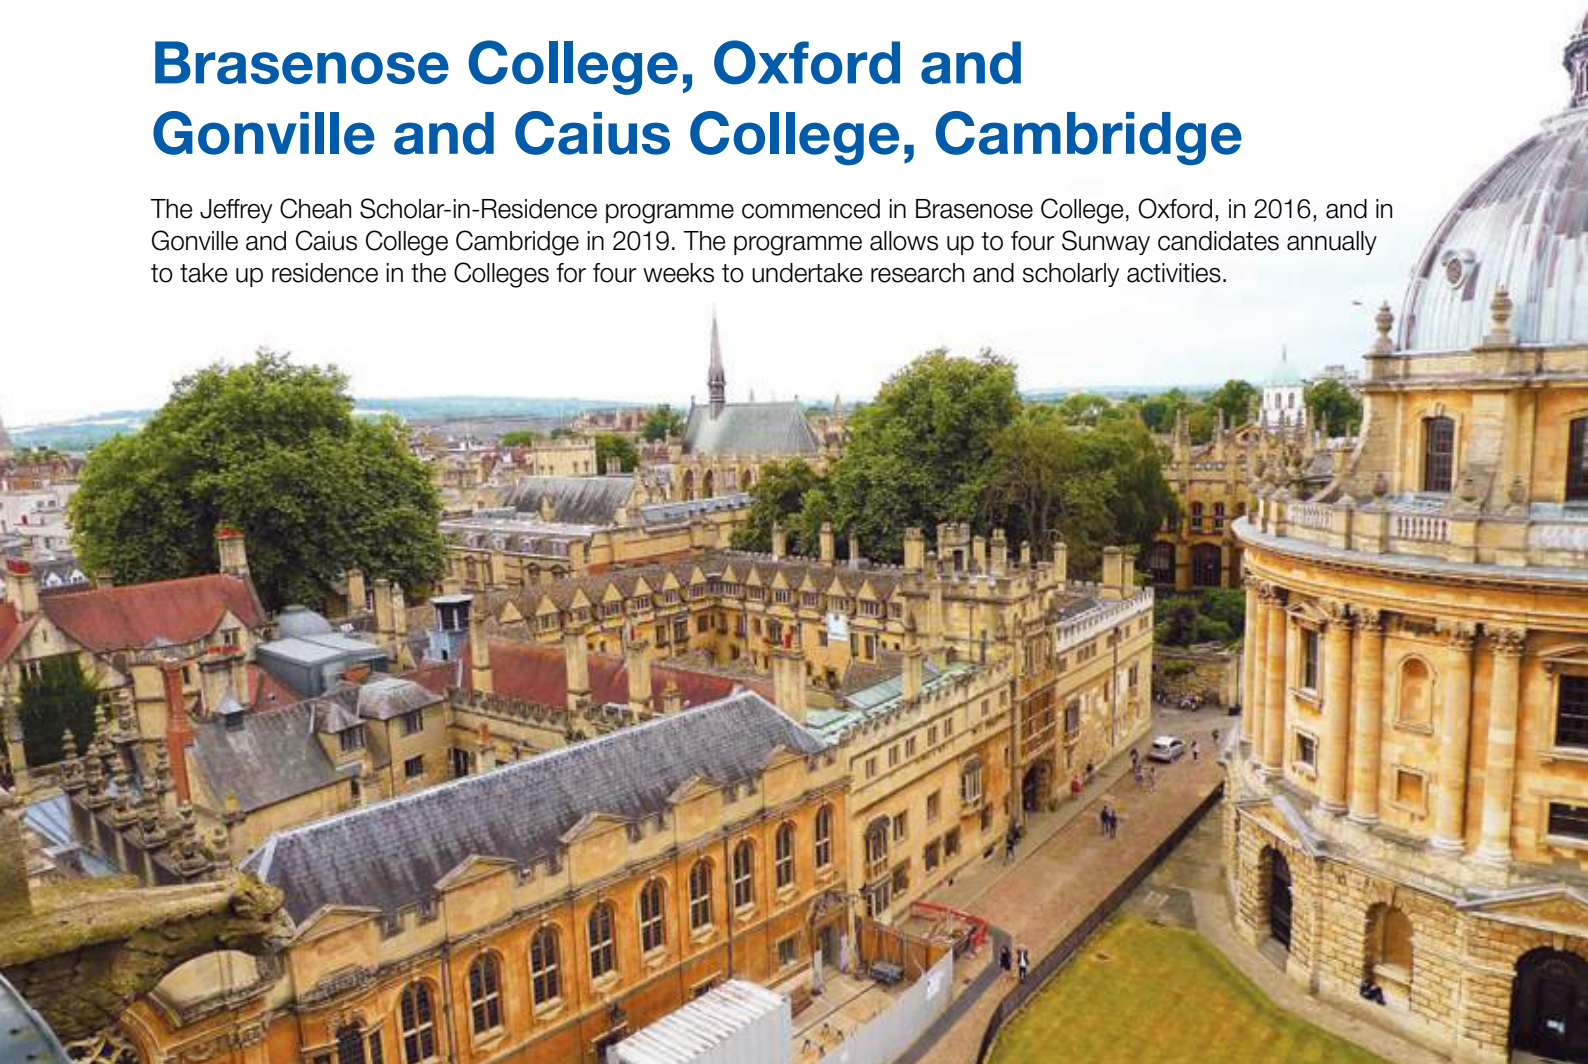

Chevening-Jeffrey Cheah Foundation Scholarship

The Chevening Scholarships are awarded by the UK Foreign and Commonwealth Office (FCO) and enable selected graduates with leadership potential to undertake a one-year master's degree by coursework in British universities. The prestigious scholarships are jointly funded by the FCO and participating organisations which, in Malaysia, included BAE, CIMB, HSBC, Khazanah Nasional, Prudential and Shell. The Jeffrey Cheah Foundation (JCF) became a Chevening partner in 2019. In March, a Memorandum of Agreement was signed at the British High Commission by Tan Sri Dato' Seri Dr Jeffrey Cheah AO and the UK High Commissioner, HE Charles Hay MVO. The first Chevening-JCF scholar, Ho Rhu Yann, chose to pursue a master's degree in public health at the University of Edinburgh.

Brasenose College, Oxford and Gonville and Caius College, Cambridge

The Jeffrey Cheah Scholar-in-Residence programme commenced in Brasenose College, Oxford, in 2016, and in Gonville and Caius College Cambridge in 2019. The programme allows up to four Sunway candidates annually to take up residence in the Colleges for four weeks to undertake research and scholarly activities.

Senior Appointments

New Senior Hires

- **Professor John Steven Perry Hobson**
*Pro-Vice-Chancellor for Global Engagement
Vice-Chancellor's Office*
Date of Appointment: 2 January
- **Professor Wong Chin Huat**
Jeffrey Sachs Center on Sustainable Development
Date of Appointment: 01 April
- **Associate Professor Dr Yeong Wai Chung**
Department of Applied Statistics
Date of Appointment: 01 July
- **Professor Bradley Carl Freeman**
Head of Department of Communication
Date of appointment: 01 August
- **Ms Leong Whye Sook**
*Interim Head
Department of Nursing
School of Healthcare and Medical Sciences*
Date of appointment: 13 August
- **Professor Crispin Nicholas Bates**
Department of Communication
Date of appointment: 03 September
- **Professor Angela Amphawan**
Department of Computing and Information Systems
Date of appointment: 18 November
- **Associate Professor Dr Kenneth Anthony Cafferkey**
Department of Management
Date of Appointment: 18 November
- **Professor Raymond Patrick McNamara**
Head of Department of Accounting
Date of appointment: 11 November
- **Associate Professor Dr Soon Lean Keng**
Department of Nursing
Date of Appointment: 2 December

Adjunct and Visiting Professors

Vice-Chancellor's Office

- **Professor Sir Alan Fersht FRS**
Honorary Jeffrey Cheah Distinguished Professor
1 October 2019 – 30 September 2021
- **Dr Graeme Atherton**
Adjunct Professor
1 May 2018 - 30 April 2020
- **Professor Sir Leszek Borysiewicz**
Distinguished Honorary Professor
1 July 2018 - 30 June 2020

Provost's Office

- **Professor Eui Ho Suh**
Honorary Professor
1 July 2018 - 30 June 2020
- **Dr Peter Walker**
Visiting Professor
1 January 2019 - 31 December 2021

School of Arts

- **Professor Dr Mohd Anis Md Nor**
Adjunct Professor
1 January 2019 - 31 December 2021

Sunway University Business School

- **Professor Ramayah Thurasamy**
Adjunct Professor
1 May 2019 - 30 April 2020
- **Professor Steven Bradley**
Adjunct Professor
30 March 2017 – 29 March 2020

Senior Appointments (continued)

School of Healthcare and Medical Sciences

- **Professor Catherine M. Comiskey**
Visiting Professor
1 January 2019 - 31 December 2020
- **Dr Duncan Ronald Forsyth**
Adjunct Professor
15 January 2018 - 14 January 2020
- **Professor Jim S. Al-Khalili**
Honorary Professor
1 January 2019 - 31 December 2021
- **Professor Lee Cheok Soon**
Visiting Professor and International Advisor
1 February 2019 - 31 January 2022
- **Dr Lee Fatt Soon**
Adjunct Professor
1 October 2018 - 30 September 2020
- **Professor Lembit Sihver**
Adjunct Professor
1 May 2019 - 30 April 2020
- **Professor Mark Antony Hill**
Adjunct Professor
1 June 2019 - 31 May 2022
- **Professor Dr Ngeow Yun Fong**
Adjunct Professor
1 April 2019 - 31 March 2022
- **Dr Philip Poi Jun Hua**
Adjunct Professor
1 October 2018 - 30 September 2020
- **Professor Sibrandes Poppema**
Distinguished Honorary Professor
1 August 2018 - 31 July 2020
- **Professor Tan Maw Pin**
Adjunct Professor
1 October 2018 - 30 September 2020

School of Science and Technology

- **Professor Ahmad Hakimuddin Razi**
Adjunct Professor
1 April 2017 - 31 March 2020
- **Dr Heng Boon Chin, Alexis**
Adjunct Professor
1 March 2019 - 28 February 2022
- **Professor Kang Ming**
Visiting Professor
31 December 2019 - 31 March 2020
- **Professor Kenneth Laidlaw**
Adjunct Professor
1 June 2017 - 31 May 2020
- **Professor Dr Laiha Binti Mat Kiah**
Adjunct Professor
1 February 2019 - 31 January 2022
- **Professor Louise Helen Philips**
Adjunct Professor
1 July 2018 - 30 June 2020
- **Professor Nigel Vincent Marsh**
Adjunct Research Professor
1 April 2019 - 31 March 2022
- **Professor Dr Phang Siew Moi**
Adjunct Professor
1 July 2018 - 30 June 2021
- **Dato' Dr Vellayan A/L Subramaniam**
Adjunct Professor
1 April 2019 - 31 March 2021
- **Dr William Henderson**
Adjunct Professor
1 December 2018 - 31 December 2020

Investing in The Future

Sunway Campus Library

The Sunway Campus Library was rated number 1 in Asia under the physical library category of the iGraduate Barometer Survey in 2018, which was a truly remarkable feat. Not resting on its laurels, in 2019, the Library, continued to work hard to transform itself into a truly digital library by providing its users easier remote access to more resources. The Library continued to provide a wide range of services and made some improvements based on its Customer Satisfaction Survey, which included the following:

- Expanding the Silent Zone and adding Six Group Project Pods;
- Providing additional study space from 6.00 pm to 10.00 pm during weekends;
- Adopting the “Facial Recognition” technology for its security system in line with IR 4.0;

A total of 181 information skills workshops were held for a total of 3,962 students to familiarise themselves with finding library resources.

The Library also subscribed to eight new e-databases, including Bloomsbury popular music, Drama online, Films on demand, Lexis advance Malaysia, MathSciNet, Proquest One Academic package, UNWTO eLibrary and Vault.

The Library was successful in passing its SIRIM Surveillance Audit for ISO9001:2015 in April 2019.

Facilities

The University's expansion plans continued to take centre stage in 2019 with a prominently located careers hub erected right at the foyer, for employers to meet and mingle with students. A number of renovations also took place in and around the campus to ensure facilities were fit-for-purpose; these include the computing labs, the graphene and advanced 2D Material Research Group, the Fabrication Lab and Fashion Studio. Also, in 2019, a new postgraduate working space was fit out.

Another major renovation that took place was the CLIO Exhibition Centre which is to be used to house large examinations starting from 2020. The University also acquired two satellite learning spaces to cater for the expansion in Art and Design and for the development of the Engineering programme.

Campus Sustainability

In 2019 the “Campus with a Conscience” theme was introduced to ensure all University activities and initiatives reflected the essence of the sustainable development goals in more ways than one.

The year started off with the “ThinkB4Print” Campaign 2019 roadmap organised by the IT Services Department to create awareness and to encourage all Sunway staff and students on campus on the need to save paper and the environment, as paper production has a direct correlation with deforestation. The 5-month long campaign looked at providing printing guides using Augmented Reality “AR”, printing tips and providing alternative usage to paper such as using e-form and cloud storage.

Sunway iLabs organised “The Make It Challenge”, an annual hackathon where students are tasked to develop solutions to address one of the United Nations Sustainable Development Goals (SDGs). Students were selected based on their video submissions. The theme for 2019 was goal number 12: Responsible Consumption and Production.

In partnership with the United Nations Technology and Innovations Lab (UNTIL), Sunway iLabs organised a “Reboot the Earth” hackathon in August, to develop solutions addressing the climate crisis. “Reboot the Earth” was planned as a social coding event to bring budding computer programmers, scientists and interested parties together under the auspices of the United Nations, to improve upon or to build new software programmes focusing on climate action.

Other initiatives by the Facilities Department included a creation of a butterfly garden and vertical planting to further green the campus and create a healthy eco-system. Aside from that, clothing recycling bins were placed at strategic locations around campus to promote responsible disposal of re-usable clothing items. The campus community was encouraged to deposit used clothing, footwear, bags and other fabrics suitable for re-using or re-cycling.

Prizes, Awards and Achievements

Caroline Yap Yu Li from the Business School, received the Award for Excellence in Teaching in 2019.

Professor Mohammad Khalid and **Dr Abdul Khaliq Rasheed** received the Gold Medal at the 30th International Invention, Innovation and Technology Exhibition (ITEX) 2019.

Professor Mohamed Kheireddine Aroua and **Professor Saidur Rahman** received the coveted recognition as 2019 Highly Cited Researchers in the field of Engineering. The Clarivate Analytics list of Highly Cited Researchers recognises researchers with exceptional performance demonstrated by production of multiple highly cited papers that ranked in the top 1% by citations for field and year in Web of Science.

At the 2019 Design Workshop organised and hosted by Tatung University, Taiwan, students from the BSc (Hons) Design Communication (**Jane Law Jing Man**, **Ong Wei Pheng** and BSc (Hons) Interior Architecture (**Er Wei Siang**) were awarded the Best Design Team.

At the 2019 Risk Intelligence Challenge (RIC), organised by Deloitte Malaysia, BSc (Hons) Actuarial Studies students, **Sun Wai Yin** and **Wong Joo Ann** took the 2nd runner-up title.

Amyrul Fahmi, BSc (Hons) Digital Film Production student, won awards for two films he directed.
