

OCTOBER – DECEMBER 1990

KDN PP 6/6/1990

Dato' Jeffrey Cheah (left), Chief Executive Director of SungeiWay Group Sdn Bhd and Mr Robert Kumpen, President of Kumpen Group, at the Keramo Signing Ceremony

Sunway Keramo is born – Dato' Jeffrey Cheah and Mr Robert Kumpen seal the agreement

ANOTHER MILESTONE FOR SWG — THE FORMATION OF SUNWAY KERAMO

Sunway Keramo Sendirian Berhad (SKSB), a joint-venture between SungeiWay Group (SWG) and N V Keramo of Belgium will be the biggest vitrified clay pipe manufacturing plant in South East Asia.

The setting up of a \$35 million factory, which is to be located on a three-hectare site in the Klang Valley is expected to commence production in early 1992.

Con't to pg 2

Con't from pg 1

SKSB will have a capacity to produce 40,000 tonnes of "Keramo Brand" vitrified clay pipes and fittings annually under a two-shift operation.

For this, it will employ more than 200 staff and will be equipped with modern machinery and technology. All raw materials will be sourced locally.

SKSB also aims to be the market leader in the supply of vitrified clay pipes. It hopes to capture a large percentage of local clay pipes market and also export its product throughout the Asia Pacific region.

Vitrified clay pipes are used mainly as conduits for sewage treatment plants and oxidation ponds.

Sungei Way Marketing is at present importing the Belgian vitrified clay pipes for distribution in Malaysia as well as to Brunei, Singapore and Indonesia.

With the signing ceremony, which was held on 22nd November 1990, SWG has achieved yet another milestone in the rapid development of the company.

HIGH IMPACT PRESENTATION

Adasia, SWM and SWCS had a 2-day programme titled 'HIGH IMPACT PRESENTATION' at Holiday Villa on 13th and 14th October 1990. There were 20 of us and the programme started at 9.00 a.m. and ended at 5.30 p.m. daily. The lecturer was Mr Jimmy Yapp of Adlearn.

The programme's objectives were:-

1. Understanding the presentation and interaction process.
2. To develop a systematic and impactful presentation before a client.
3. To familiarise oneself in the use of props and visual aids for High Impact Presentation.

The above is the dry factual information on the programme. However, the programme itself was very interesting and stimulating. Here are some feedback from the participants.

1. You not only taught us how to present impactfully but you also demonstrated it very well. Your materials are clear and concise and I'm sure everyone will be able to present impactfully if they follow your points and tips.
2. A lot of fun! Great job! However, it would be better if participants could go centre-stage more often.
3. The seminar was extremely productive, stimulating and at the same time fun. I cannot find any minuses worth writing (maybe next time) but I would be looking forward to your other seminars.
4. A very good course, suitable for marketing reps and support staff who have to provide demo for clients.

If you think that I have only presented the good feedback and hidden the bad ones, you are right. There was one feedback that was neither good nor bad. The rest spoke highly of the programme.

The purpose of this article is not to sing praises for Mr Jimmy Yapp but rather to give a general view of the programme. This was achieved by quoting some feedback from those who attended. Participants' opinions were sought too and were presented below.

Participants of High Impact Presentation with Mr Quah Siak Seng (centre) and lecturer Mr Jimmy Yapp (left of Mr Quah)

Participants in action!

"Oh no, training on weekends... sigh... But since I have to be here, better make the best out of it."

"Mmm...Jimmy Yapp. He looks presentable. Professional. He speaks well too. Oh my gosh, he wants us to jump and shout. He's making us sing. He's making us twist. We are laughing, like children in the kindergarden."

"Stop! We are serious again. He is teaching and advising. He gives examples and shows us what he preaches. We are learning... like children in the kindergarden."

What we learn is fun and not

easily forgotten.

On no, end of weekend already? So much to learn, so much fun learning them, so little time.

Hmmm... I wonder what he meant when he said, "Do infants have more fun in infancy than adults in adultery?"

After the weekend, we had a skill transfer programme where we shared our wisdom which we gained, with our colleagues (SWCS and Adasia) who missed out on the Impactful Presentation.

SUN-MIX CONCRETE SDN BHD

INTRODUCTION

"Concrete" a general term used daily in our construction industry, is a mass consisting of aggregates and sand mixed with a certain proportion of cement and water. The proportion of the mixes will depend on the strength of concrete required. The concrete by itself has no specific shape. Its shape is purely dependent on the mould (formwork) that has been prepared. In any building structure, the concrete takes care of the compression force while the steel reinforcement handles the tension component. "Concrete mix design" is a specialised subject by itself.

Before readymixed concrete was introduced in the industry, "site mix" was the common method used in the production of concrete. The word 'site mix' is self-explanatory whereby the

required material and water are mixed at site as and when required. The following setbacks are commonly encountered in construction sites.

1. Lack of available space for storage of material
2. High wastage
3. High labour costs
4. Slow production and inconsistent quality
5. At large sites, transportation problems
6. Increase in construction time

To reduce the problems faced in site mix, readymixed concrete was introduced.

THE NO. 1 IN THE COUNTRY

Since its inception into Sungei Way Holdings Bhd in 1983, Sun-Mix Concrete has grown and diversified to become the largest readymixed concrete producer in the country. This rapid growth can be directly attributed to its adherence to a consistent set of policies that revolve upon the recognition of its human resources, reliable quality products and a strong customer service. Sun-Mix greatly emphasizes on the latest research and development to continuously provide reliable service and consistent quality concrete to its customers.

The company is not only the founder member of the National Ready-Mixed Concrete Association of Malaysia but also a member of the British Ready-Mixed Concrete Association and the American Ready-Mixed Concrete Association.

SUN-MIX SHINES THROUGHOUT MALAYSIA

Throughout the country, more and more architects and builders of both large and small projects have begun to specify the use of readymixed concrete to ensure consistent quality. Confident in its product and anticipating this surge in demand, Sun-Mix has over the years, set up the latest computerised high technology concrete batching plants throughout Malaysia. Sun-Mix batching plants are today strategically located at Penang, Butterworth, Alor Setar and Sungei Petani in the North, Subang Jaya, Sungei Besi and Klang in the Central Area, Tampoi and Pasir Gudang in the South and at Kemaman in the East Coast.

Production efficiency is the key to Sun-Mix's reputation. Capable of producing up to 100 cubic metres per

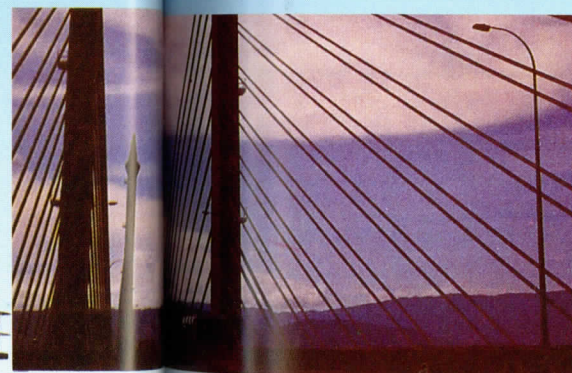

hour of quality controlled concrete, each plant is able, through a sophisticated queueing system, to supply concrete 24 hours a day. Sun-Mix's readymixed concrete is delivered to all its customers by its fleet of 90 radio-phones-equipped concrete mixer trucks.

Sun-Mix Concrete takes its role as the national leader in concrete technology seriously. As a major concrete supplier to many buildings in Malaysia, our responsibilities to safety are enormous and deeply entrenched. As a result, quality control at Sun-Mix borders on the obsessive side and we are proud of it. Right from the pre-production, production and until time of delivery, our team of experienced concrete technologists continuously monitors the process, tests and checks to ensure the concrete meets the required specifications.

Strong recognition of its human resources has enabled Sun-Mix to expand and diversify rapidly. Serious attention is placed on its staff welfare and training to meet the expectations of the industry. Many landmark structures in the country speak loudly of the success of Sun-Mix Concrete. Multi-storey buildings that dominate the city skies such as Wisma Genting, Kuala Lumpur, Bangunan Sri Mara, Kuala Lumpur, Menara Bank Pembangunan, Kuala Lumpur and The Penang Bridge, stand as proud examples of the technology of Sun-Mix and the movement towards safer structure and cost efficient construction.

An important achievement of Sun-Mix Concrete is its success in bringing the readymixed concrete concept to the smaller projects. From high rise, housing estates to renovation works, Sun-Mix Concrete is ever ready to serve the entire construction industry with concrete technology of the highest standard.

Mr. S. Ragunathan

INSURANCE

Believe it or not?

The following are actual statements found on insurance claims forms where drivers attempted to summarise the details of an accident in the fewest possible words.

- Coming home I drove into the wrong house and collided with a tree I never had.
- The other car collided with mine without giving warning of its intention.
- I thought my window was down, but I found out it was up when I put my head through it.
- I collided with a stationary truck coming the other way.
- A truck backed through my windshield into my wife's face.
- A pedestrian hit me and went under my car.
- The guy was all over the road. I had to swerve a number of times before I hit him.
- I pulled away from the side of the road, glanced at my mother-in-law and headed over the embankment.
- In an attempt to kill a fly, I drove into a telephone pole.
- I had been shopping for plants all day and was on my way home. As I reached an intersection, a hedge sprang up, obscuring my vision and I did not see the other car.
- I had been driving for 40 years when I fell asleep at the wheel and had an accident.
- I was on my way to the doctor with rear end trouble when my universal joint gave way causing me to have an accident.
- As I approached the intersection a sign suddenly appeared in a place where no stop sign had ever appeared before. I was unable to stop in time to avoid the accident.
- To avoid hitting the bumper of the car in front I struck the pedestrian.
- My car was legally parked as it backed into the other vehicle.
- An invisible car came out of nowhere, struck my car and vanished.
- I told the police I was not injured, but on removing my hat, I found that I had a fractured skull.
- I was sure the old fellow would never make it to the other side of the road when I struck him.
- The pedestrian had no idea which direction to run, so I ran over him.
- I saw a slow moving, sad faced old gentleman as he bounced off the roof of my car.
- The indirect cause of the accident was a little guy in a small car with a big mouth.
- I was thrown from my car as it left the road. I was later found in a ditch by some stray cows.

TRAVELLING AUDITORS

What is your first impression of auditors? To some, an auditor is seen as "All U Do Is Tick" and many think that auditors are calculative, square and boring people. They also regard auditors as bloodhounds or watchdogs, ready to pounce whenever given a chance.

Well, the above statements are definitely not true. Our main responsibility towards the group is to review the system in operation making sure that it is working properly in line with the Group's policies.

As auditors, we travel extensively visiting subsidiary offices and operational sites so as to familiarise ourselves with the operations system and procedures implemented.

So far we have visited our subsidiary offices in Johor Bharu, Terengganu, Penang, Alor Setar, Muaazam Shah (a small town situated not very far from Kuantan) and Singapore.

We usually travel by car to reach our destinations and sometimes by plane. There were times we had to walk to reach the site with the sun brightly shining on us. Imagine the number of shoes worn out during the years!

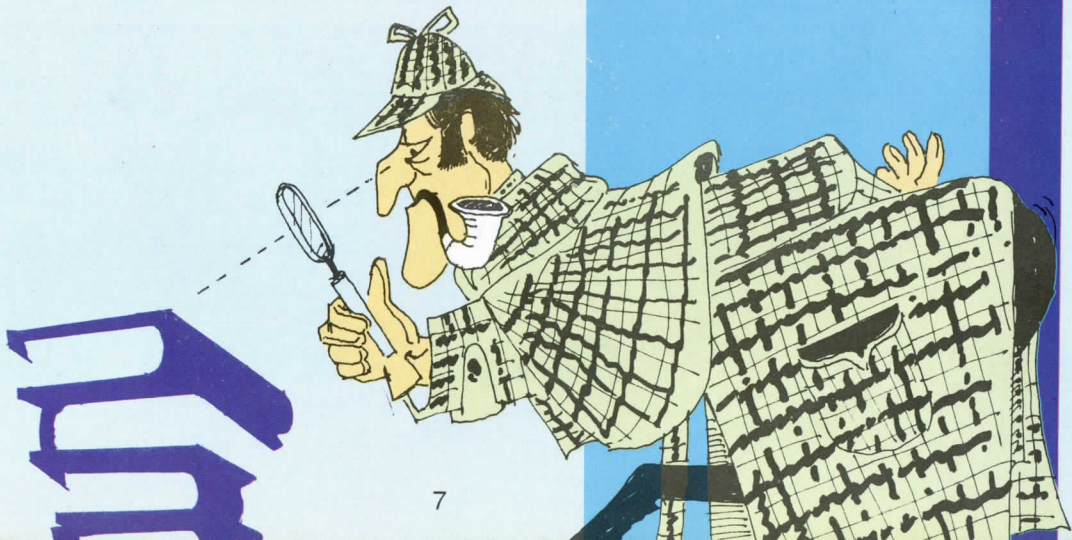

Despite all these, the internal auditing is still an interesting job. Besides the opportunity to travel, it also enables us to meet people of all levels, ranging from operating floor to managerial level.

Most of the people we meet are friendly and helpful. We really appreciate that as it makes us feel welcome. To those involved, we thank you for making our stay interesting and memorable.

The SWCS Tour De Fun

– Club-Med Cherating '90

October 6 was a very special day for Sungei Way Computer Services as it was the day everybody was looking forward to for the past two months, the day for the SWCS Tour De Fun.

On that special morning, 38 computerians from SWCS K.L. and Singapore gathered in front of the IBM Plaza well-prepared, fully dressed, all geared-up and eagerly waiting for the coach. When the coach arrived, everybody rushed up so quickly to get his seat as though we were playing 'Musical Chairs'.

The journey into Fun took about 6 hours. Cruising along the way, that gossips, funny (dirty) jokes and hearty laughter were all over the coach.

Upon arrival at the club, we were welcomed by a group of charming G.O.s (Gentle Organizers) wearing fancy clothes, funny hats and with smiling faces.

In no time, we checked in to our rooms, changed into our all weather sporting attires and immediately jumped into action. The computerians were all over the place, doing everything – sailing, windsurfing, tennis, squash, swimming, archery, aerobics, yoga, table tennis, sunbathing, basketball, volleyball, soccer, disco, lambada, etc.

The following two days, we did not do very much. We were just playing, eating, laughing, enjoying, having fun, Fun, and more FUN!! In short, we were just,

*Thinking Absolutely Nothing,
Trying Absolutely Everything,
Feeling Absolutely Great.*

We came back on October 8 all tanned, physically drained-out but mentally fully charged. The only regret we have is that we did not have enough time to do everything a few more times.

Anyway, we are already into the planning of our next (more days) Tour De Fun '91.

SUNGEIWAY GROUP FAMILY DAY AT SUBANG WONDERLAND

There was a hive of activities that set the mood for SungeiWay Group Family Day at Subang Wonderland on the 18th November 1990.

This has been the biggest turn-out for Family Day so far with more than 1,000 employees and their families.

With such overwhelming support, it is hoped that the objective of

the Family Day – to foster better understanding and interaction between staff of the SungeiWay Group and their family members, will be met.

For this, a series of interesting telematches were organised for both adults and kids alike. Guffaws, giggles and cheers prevailed as each team tried to outdo the other. This was followed by lunch and later continued with rounds and rounds of fun rides.

RESORT DEVELOPMENT AT BANDAR SUNWAY

The Resort Development forms the central core of the whole Bandar Sunway project and is sited on 175 acres out of the 500 acres of township.

The unique feature of this resort development is its location in a big depression that was formally a quarry mine.

Instead of turning the huge depression into a big passive lake, the Resort Development would comprise a 500-room resort hotel, 200-units hotel suite, a proposed theme park (made up of Water Theme Park, Tin Mine Park and Family Fun Park), Tropical Garden Park, Amusement Lake and Amphitheatre.

The centre of it is a big clear lake of 17 acres and surrounded by 20 acres of lush landscaping and greenery with natural lime-stone outcrops and waterfalls.

All the components of this Resort Development are planned to integrate and compliment each other as the one-stop leisure centre.

The theme parks will comprise a Water Theme Park, similar in kind to that of Typhoon Lagoon Disney World (Orlando, USA) or the Sea-World (Australia), a Tin Mine park and a Family Fun park that will feature local cultural contents (for e.g. old tin mine, pottery making, pewter making, etc) and other facilities such as jungle boat rides, street stuntman shows and others.

The Conventional/Conference hotel is planned for 500 rooms with the supporting 200 units of all suites and will take a unique shape of a ship to tie in with the water and landscape theme of the development. It is designed to terrace all the way down to the lake with many of the rooms enjoying spectacular lake view. Facilities provided will cater for both local and overseas corporate conferences and at the same time provide accommodation for tourists visiting the theme parks.

The Amphitheatre will be highly sophisticated and it is felt that there is a need for such a facility to cater for both local and foreign stage performances.

The rest of the resort development will feature an active amusement lake and passive recreational activities with waterfalls, landscaping, pedestrian tracks, picnic areas and lots of food and beverage outlets in the Tropical Garden Park.

BANDAR SUNWAY SECURITY GUARDS

Thieves and robbers planning to prey on Bandar Sunway residents would be in for a surprise.

Bandar Sunway Sendirian Berhad has set up a 24-hour security force which comprises of highly trained and disciplined guards.

Mejar (retired) Shariman Adnan stressed, "They are highly trained and disciplined and are all aware of the powers they had been given."

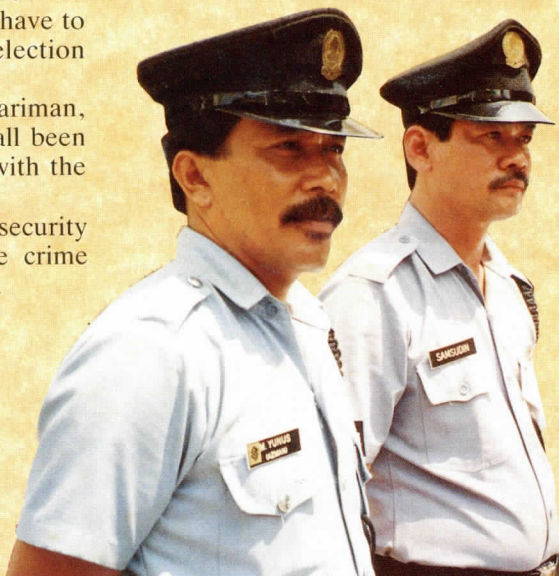

"We drill them in legal rights. We also believe that they should be highly disciplined as this will motivate them to be more dedicated in their work," says Mejar Shariman.

Bandar Sunway residents are now able to go to work and sleep peacefully with the assurance that there will be guards patrolling the area on foot and three units of armed and uniformed mobile personnel.

The guards, mostly ex-police Armed Forces personnel or experienced in security work have to go through a "fitness" selection process.

According to Mejar Shariman, the security personnel have all been trained to establish rapport with the public.

He said the presence of security personnel has cut down the crime rate in the area considerably.
